Hasbro Children's Hospital
The Pediatric Division of Rhode Island Hospital
Lifespan. Delivering health with care.®

INTRODUCTION

Hasbro Children's Hospital welcomes collaboration with pediatricians throughout New England and across the United States, sharing our commitment to provide the highest level of quality care to young patients.

To assist pediatricians with their referrals to one or more of the services and specialties available at Hasbro Children's Hospital, we have compiled this resource guide highlighting our programs, specialty providers, and specific questions or concerns about patient referrals. This electronic guide can be bookmarked on the desktops within your office for easy access.

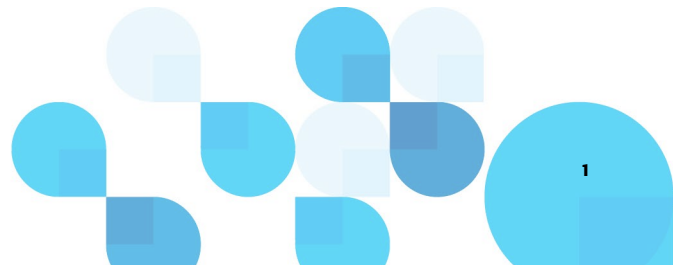

We offer a wide range of programs for children and adolescents that include the Respiratory and Immunology Center, the Pediatric Heart Center, and the Division of Pediatric Gastroenterology.

Our care teams share the respect and dedication you have for your patients and thank you for your trusted referral.

To support you and your patients in maintaining their good health, our specialists, staff, and administration are available to connect with you throughout the year, whether to provide another perspective for a current patient's situation or to help you navigate the variety of programs and services we offer.

BASIC REFERRAL

When Making a Referral

For any referral by a provider to Hasbro Children's Hospital, the following information must be provided:

- **Insurance authorization**
 - Authorization must be obtained prior to services rendered
 - The **insurance referral authorization number, with visit count or validity dates**, should be sent with the original request to see a specialist. Most insurance authorizations can be listed under Rhode Island Hospital's National Provider Identifier: 1588659528.
- **Demographic/face sheet for patient**
- **Prior office notes**
- **Growth charts**
- **Immunization records**
- **Any related diagnostic imaging**
- **Recent lab work**
- **Specific questions and concerns about patient who is being referred**

Thank you for your referral and for trusting us with the continued care of your patient. Please see the provider's information page within this guide for specific details on submitting your referral.

The following are the locations of the Lifespan pediatric specialty clinics:

10 North Main Street, Suite 2C, Fall River, Massachusetts

1454 South County Trail, Suite 1300, East Greenwich, Rhode Island

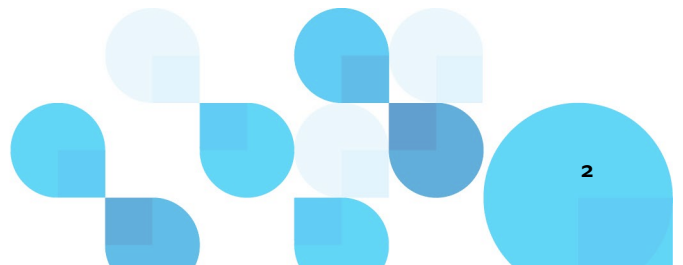

701 George Washington Highway, Suite 104, Lincoln, Rhode Island

St. Anne's Fernandes Center, Fall River, Massachusetts

900 Warren Avenue, Suite 201, East Providence, Rhode Island

Hasbro Children's Hospital
The Pediatric Division of Rhode Island Hospital
Lifespan. Delivering health with care.®

Our Allergy and Immunology team at the Respiratory Immunology Center provides expert diagnosis, evaluation and treatment for adolescent and pediatric patients with allergy and immune diseases. Our specialists are certified by the American Board of Allergy and Immunology. We partner with specialists from Hasbro Children's Hospital and Rhode Island Hospital to ensure that all patients receive appropriate, comprehensive care. We work with patients and their families to provide individualized treatment and education that will help them manage the child's illness and increase their well-being.

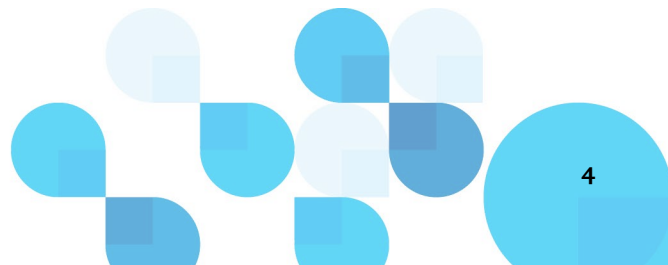

Allergy and immunology disorders diagnosed, evaluated and treated include:

Allergic rhinoconjunctivitis
Adverse drug reactions
Anaphylaxis
Asthma
Atopic dermatitis (eczema)
Contact dermatitis
Food allergy
Immunodeficiency
Mastocytosis/mast cell disorders
Eosinophil disorders
Urticaria/angioedema
Stinging insect reactions

Testing and therapeutic interventions include:

Skin testing to food, medication
Patch skin testing to chemicals
Allergen immunotherapy
Insect venom immunotherapy
Desensitization to medications
Monoclonal antibody therapy

Programs and Services

Serving children with co-existing medical and psychiatric conditions within a family-based framework and day treatment setting.

Information needed for referrals

- Patients 6-18 years of age
- Program intake form
- Pertinent medical records including provider summary of goals for admission
- Current level of functioning
- Growth charts and overview of nutritional status
- Vaccine records including COVID-19 vaccination/infection

Provider can call to get information; however, guardian must call to place child on the waitlist.

Partial Hospital Program Referral Process

Intake coordinator collaborating with nurse manager, peds and psych co-directors

- a. Receive initial referrals from broad range of sources:
 - i. Providers including PMDs, medical specialists, psych providers, other inpatient services
 - ii. Families
 - iii. Other services: DCYF, courts, schools
- b. Information required for consideration
 - i. Intake form (see attached) if requested (complex patients, those without sufficient records in Hasbro chart)
 - ii. Pertinent medical records
 - iii. Assessment of appropriateness for treatment
 1. Patient presentation has physical and emotional components
 2. Acuity matches level of care
 3. Presence of functional impairment
 - iv. Assessment of patient and family readiness for treatment
 1. Patient and family understanding of factors contributing to presentation
 2. Openness to integrated, family-based treatment
 3. Family availability for involvement in treatment
 4. Considering objective factors as well as your “gestalt”
 5. Pre-admission meetings with team and patient/family can be helpful
