

MyChart
Your secure online health records

MyChart allows the patient to log in from any computer or smartphone (through the Epic MyChart App) so they can be more active in their own care.

- Review laboratory and imaging tests
- Request prescription renewals
- Monitor your health information
- Learn about medical conditions
- Record important information (such as blood pressure and glucose levels)
- Securely send messages to your providers
- Request the transfer of your health record
- Request, reschedule or cancel an appointment

How We Can Help You

Our commitment

We provide high quality, youth-centered healthcare services to adolescents and young adults. We work closely with patients to assist them in the management of their healthcare and the attainment of the highest level of wellness possible.

What is our expertise?

In addition to a three-year pediatric residency, adolescent medicine physicians also complete an additional three-year fellowship in adolescent medicine.

How do we handle issues related to privacy and confidentiality?

We give all youth the opportunity to speak to their clinician alone during their visit. Our clinic welcomes parent involvement, but we also try to encourage our patients to speak for themselves, and to understand and discuss their own medical and emotional needs. Our goal is to include parents in as much of the discussion as possible while respecting the patient's privacy regarding more personal health concerns.

Services Provided

- Primary Care
- Well Visits ("check-ups")
- Follow up visits for medical problems
- Sick and Urgent Care Visits
- Mental health care, including medications and short-term therapy
- Social Work Counseling
- Nutrition Counseling

- Dietitians
- Outpatient service representatives
- Care coordinators

We are a Primary Care Patient Centered Medical Home (PCMH)

- PCMH uses a model of care that puts patients and their families at the forefront of care.
- PCMHs build relationships between people and their healthcare teams.
- Your care team is responsible for ensuring they work with you to provide you with the best quality care possible.
- We provide care, coordination of care, and referrals to community and educational resources, such as:
 - College and work training
 - Transportation
 - Housing
 - Health insurance
 - Pharmacy questions
 - Nutrition and exercise

Who We Care For

We see patients ranging in age from 10-22 years old. We assist with transitioning patients to an adult practitioner before age 22.
