

Caring Conversations

Presented by The Miriam Hospital Patient
and Family Advisory Council

What is it?

- Caring Conversations creates warm, guided opportunities to talk about advance care planning before a crisis.
- Our goal is to help patients, caregivers, and families understand key Advance Care Planning concepts and document what matters most.
- By supporting individuals and families in having warm, guided conversations about their wishes.
- Helping you to clarify differences between living wills, durable power of attorney, and advance directives.
- Many struggle when a loved one passes without sharing their wishes.
 - These moments reveal how often families face uncertainty during critical decisions.

Who is this for?

This program is for **anyone**. Whether you're curious about planning ahead, understanding your options, or need support with conversations around healthcare decisions.

Next Session:
